

CASI CA VIDEOS September 3 2012

Table of Contents

Part 1 - Aug. 6

[Introduction to Conservation Agriculture Cropping Systems](#) 7:12

The first video in the documentary series defines conservation agriculture and outlines its increasing credibility in the global context.

Part 2 - Aug. 13

[The Value of Residues in Conservation Agriculture Systems](#)

California farmers have tended to adopt “clean cultivation” systems, but research has shown that maintenance of residues from the previous crop or a winter cover crop helps improve soil and reduces evaporation from the surface.

Part 3 - Aug. 20

[Conservation Agriculture in Tomato Production Systems](#)

These systems cut production costs, reduce dust emissions and store more carbon in the soil.

Part 4 - Aug. 27

[Conservation agriculture in dairy silage production systems](#)

Three dairy farmers committed to conservation agriculture systems in their silage production share their secrets and success.

Part 5 - Sept. 3

[Minimum tillage systems](#)

This video features examples of a number of reduced pass or ‘pass combining’ tillage systems that have been developed during the past decade.

Part 6 - Sept. 10

[Coupling conservation tillage with overhead irrigation](#)

Overhead irrigation systems, such as center pivots, are particularly useful when coupled with conservation tillage.
